

# I want to install Recruit Studio add-ins

---

*Add-ins are optional modules that you can add to your existing Recruit Studio database to enhance the features.*

*The most popular add-ins cover:*

- *Reports on user activity*
- *Pipeline active vacancies report*
- *Our module for temp recruitment: TempStaff*

1. Go to [www.recruitstudio.co.uk](http://www.recruitstudio.co.uk) and from the Download menu choose 'Add-ins'.
2. Click on step 1 to download the add-ins software and click 'Run' when prompted. Allow the software to download and install.
3. Next you need to configure the add-ins so they are enabled in Recruit Studio. Firstly open Recruit Studio.
4. From the Tools menu choose 'Configure'.
5. In the lower half of the new screen, tick the add-ins that you require. For reporting, a good report is 'UserStatistics'.
6. Click 'Ok' and Recruit Studio will close.
7. Reopen Recruit Studio and you will find the add-ins that you selected on the Tools menu.
8. You can install the add-ins on as many PCs running Recruit Studio as you wish.

Instructions for installing the Microsoft Outlook 2007 add-in are different and can be found [here](#).
